Full-Stack Developer (React.js & Django & Node js)

PROFESSIONAL SUMMARY

Full-Stack Developer with over **3 years of experience** in building scalable, high-performance web applications. Expert in frontend development using React.js and Next.js, with a robust backend toolkit encompassing Node.js (Express) and Python (Django DRF). Proven track record of architecting end-to-end solutions, integrating secure APIs, and optimizing database performance. A collaborative problem-solver dedicated to leveraging modern tech stacks to deliver seamless, user-centric digital experiences.

SKILLS

Frontend	React.js,HTML5,CSS3,JavaScript,TypeScript,Shadcn UI, React Query
Backend:	Django, Django REST Framework (DRF), Node express
Languages:	Python, JavaScript, TypeScript, AJAX
Version Control:	Git, GitHub
Databases:	PostgreSQL, SQLAlchemy, prisma ORM ,Django ORM
Mobile development:	React native, expo , Native wind , nativewindUi
Deployment:	Docker , AWS , ECR ,lamda fnctions , APP runner
AI Tools:	Ollama, OpenClaw, Claude Code

PROFESSIONAL EXPERIENCE

Fullstack Developer Ecomoney Insurance Broker	Oct 2025 - MAY 2026 <i>Gurugram, Haryana</i>
--	--

[Live link](#)

- Successfully integrated and tested **Bajaj Allianz** Property Insurance APIs within the UAT environment, ensuring 100 Percent data accuracy before production rollout.
- Implemented **Care Health insurance** APIs to automate and optimize customer policy renewal workflows.
- Integrated Razorpay payment gateway with webhook functionality to enable secure and efficient transaction processing.
- Architected a lightweight **automated reminder system** leveraging existing infrastructure, utilizing **cron jobs** and database polling to manage notifications without the overhead of external queue systems or dedicated workers.
- Engineered a **WhatsApp Messaging API** integration to automate customer communications and alerts.

Fullstack Developer PCI Infotech (Singapore)	March 2024 - SEP 2025 <i>Jammu (Remote)</i>
---	---

- Developed and maintained responsive web applications using **Next.js** and **React.js**.
- Optimized web applications for maximum speed and scalability, improving performance by 30%.
- Collaborated with designers and backend developers to enhance UI/UX and application functionality.

Frontend Developer BlackCap IT	July 2023 - February 2024 <i>jammu</i>
---	--

- Implemented interactive user interfaces and ensured cross-browser compatibility.
- Enhanced user experience by integrating modern frontend technologies and best practices.
- Participated in code reviews and contributed to improving code quality and maintainability.

Diango Intern	April 2023 - May 2023
----------------------	------------------------------

PROJECTS

Multitenant SaaS Application

[Live link](#)

plura

A white-labeled, multi-tenant SaaS for agency owners.

- Website Funnel Builder: Features a drag-and-drop interface for building websites and sales funnels, including responsive views and undo/redo functionality
- Project Management: Includes a Kanban board with lanes and tickets for managing leads and business processes.
- Agency Sub-Account System: Allows agencies to create and manage client sub-accounts with role-based access control
- Technologies: Built with Next.js 14 , Prisma , clerk authentications

JKcarmart : - a digital marketplace for pre-owned cars

[Live link](#)

JKcarmart

Developed the responsive front-end for **JKCarmart**, a second-hand car sales web application, using **Next.js** and **React**.

- Implemented key features such as a search and filter system, car listing pages, and user dashboards to enhance the buying and selling experience.
- Utilized **React's component-based architecture** to build a modular and scalable user interface, improving code reusability and maintainability.

REME – Revolutionary WhatsApp Claim Management Software

[Live link](#)

reimburseme

Developed an AI-powered chatbot using CopilotKit to streamline claim management.

- Integrated currency conversion APIs for accurate and dynamic financial calculations.
- Integrations with QuickBooks APIS (Intuit developers) , to push data into QuickBooks, expenses, journal, Ledger
- **Technologies Used:** Next.js, API Integration, AI Tools

OpenAI Chatbot

Created a chatbot utilizing OpenAI APIs with advanced Natural Language Processing features.

- Enabled interactive and intelligent conversations for user engagement.
- **Technologies Used:** OpenAI APIs, Python, NLP

Multivendor Food Marketplace (Zomato Clone)

Developed authentication systems for both buyers and sellers, enhancing security.

- Implemented features for vendor management, order processing, and user reviews.
- **Technologies Used:** Django, Heroku, Render.com

IMDb API Clone

Built a RESTful API that replicates IMDb functionalities for movies and TV shows.

- Managed data models and serialization using Django REST Framework.
- **Technologies Used:** Django REST Framework, PostgreSQL

STRENGTHS

- **Consistent Learner:** Continuously updates skills with the latest industry trends and technologies.
- **Persistent:** Committed to overcoming challenges through innovative solutions.
- **Confident:** Able to take initiative and lead projects effectively.
- **Adaptable:** Quick learner who thrives in fast-paced environments.
